Dear Parents/Caregivers

Education Queensland Policy and Procedures state that an Asthma Action Plan has to be given to the school annually for all students with asthma. Asthma Action Plans are available from your doctor. Parents or legal guardians must also provide written permission for students to administer their own asthma medication.

This permission is required to be renewed on an annual basis and your co-operation is requested in completing and returning the permission slip at the end of this letter.

The permission slip needs to be returned for all students self administering asthma medication. If no permission slip is returned, our records will be amended to note no self administering of asthma medication is allowed.

Thank you for your cooperation in this matter.

Yours faithfully

Allyson Hanlon  
Business Service Manager
